

SEMIH UTKU ÖZGAN

FRONTEND DEVELOPER

I am a newly graduated Frontend Developer looking for a job. With my technical abilities and business management skills, I have the desire to pursue a career in frontend. During my university education and internship, I worked on Image Processing and Object Recognition Models. Especially with my passion for web development, my desire to improve user experience and my design skills, I want to contribute to making web applications effective and attractive to users. Although I have no work experience, I can quickly grasp new concepts with my ability to learn quickly and problem solving skills. Thanks to my collaboration and communication skills, I can work effectively in a team and quickly adapt to new projects. I am excited to start my career in frontend development and contribute to your company.

EDUCATION

- Bilecik Şeyh Edebali Üniversitesi
2019 - 2023

EXPERIENCE

- Long-term Intern Business Inteligente Bridge | 2023 - 2023
During my internship period, I focused especially on developing Image Processing and Object Recognition Models. This process has been very beneficial in terms of improving my technical skills and gaining experience working on real-world projects.
- Intern Business Inteligente Bridge | 2023 - 2023
Web projects using Html, Css, JavaScript and Angular i have improved. My internship is for me both personally and as a career he added a lot of experience.
